

The perfect combination of power and efficiency

# Magna

# Quality materials are at the heart of its robust core

The aesthetically pleasing design highlights the robust construction, suitable for demanding applications in industrial environments

The polyethylene which composes the body of the machine offers high resistance to impact. It protects all of the internal parts of the machine in order to prevent possible damage during use

# Comfort is essential for a job well done

The driving position offers full visibility and is spacious and accessible from both sides.

It has a comfortable seat with arm rests, plenty of space for the legs, an ergonomic steering wheel and all of the controls concentrated on the touch screen display.

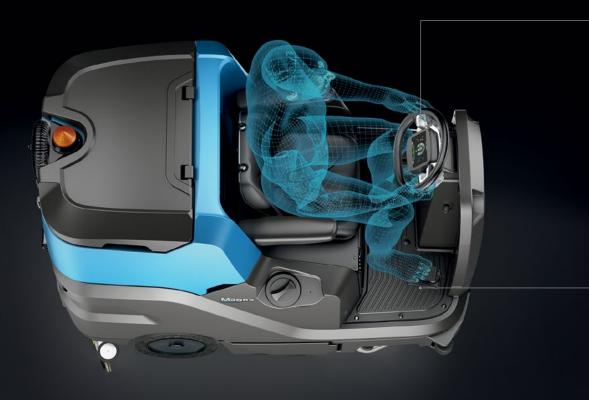

The operator is at ease knowing he has complete control over the machine and can manage all of the activities from a comfortable position, which includes enabling all of the necessary functions in a simple and intuitive manner.

Boasting FNC and Eco Mode technology, the Magna is extremely quiet, which benefits the health of the operator and of any people nearby

# Comfort is essential for a job well done

**NO TRAINING** 

The integrated video tutorials demonstrate how to perform routine and extraordinary maintenance

#### **SERVICE LIGHTS**

The exclusive lights pack offers increased visibility of the parts which could require operator inspection, illuminating the relative zones with LED lights

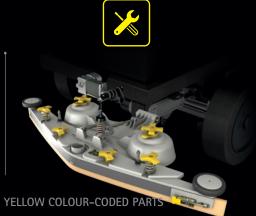

FFF - FIMAP FAST FILL

Automatic system for filling the fresh water tank, lets the operator perform other activities while the tank quickly fills up

#### SPRAY GUN

Facilitates quick and easy rinsing of the recovery tank at the end of the operation

Parts which must be cleaned regularly at the end of every shift are colour coded in yellow for easy identification, saving time and making sure that your scrubbing machine is kept in perfect condition at all times

# Equipped to provide you with the best performance possible in any environment and under any conditions

#### Dual 3-stage vacuum motor

Effective vacuum system which leaves the floor dry with no risk of slipping

#### VACUUM WAND

Enables cleaning of areas that are difficult to reach with the machine and completing the operation every time

#### **BRUSHLESS MOTORS**

For guaranteed reliability even in aggressive environments, with no maintenance required

FLR-FIMAP LONG RANGE Increases productivity by up to 70%

DAMPIII

#### Astonishing performance in any situation

A special electronic control modulates power precisely, enabling the machine to climb ramps of up to 17%\* easily and smoothly, with no interruption or loss of power delivery.

#### Adjustable pressure on the brushes

With a brush pressure which can be set to up to 150 Kg, the machine can tackle even the most stubborn dirt

<sup>\*</sup> Trailer ramp empty (in Basic version this value is guaranteed for a maximum time of 20 seconds)

When more scrubbing power is needed, activating Power Mode increases the delivery rate of detergent solution and boosts brush pressure and vacuum power for the time necessary to tackle heavy duty cleaning Lets the operator monitor cleaning results in real time from the display, without taking his or her eyes off the direction of travel

#### Light steering for even more operator comfort

The dual front wheel reduces the specific pressure exerted on the floor, making the steering action lighter. This solution also increases manoeuvrability and prevents marking, even on the most delicate floors

#### A LATERAL BRUSH FOR EVEN MORE GREATER PRODUCTIVITY

The third brush moves laterally to facilitate cleaning along walls or shelves, increasing productivity by up to 15%

Save time by working faster
Up to 6 Km/h in work mode and 9 Km/h in transfer mode

Great autonomy
Work for up to 7 hours non-stop

### **DISINFECTOR**

# Sweeps, scrubs, dries and sanitizes in one step

In order to obtain a healthy environment, cleaning must be combined with a sanitizing process.

Once the dirt, both light as dust and solid residues, and adherent, has been removed, the surfaces must undergo a treatment that reduces the presence of pathogens with the use of specific solutions.

Today, most sanitization activities are carried out manually, even in large environments, at very high costs.

Mechanizing this operation is crucial to perform it with method and regularity.

Combing sanitization with cleaning and carrying out the two actions at the same time provides extraordinary advantages in terms of time and cost.

Cleaning and sanitizing at the same time is now possible with a Disinfector scrubbing machine.

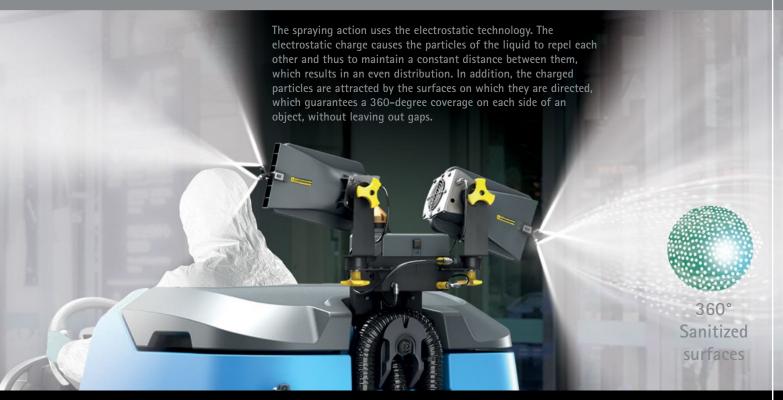

Magna scrubber dryer in Disinfector version enables the cleaning of floors and, at the same time, the sanitization of both floors and the surrounding vertical surfaces, in a single step.

This means a considerable reduction in costs, time and labour, which becomes even more significant in large spaces, where the cylindrical version of Magna Disinfector can be used, so as to achieve even 4 actions in one step:

- 1. SWEEPING
- 2. SCRUBBING
- 3. DRYING
- 4. SANITIZING

### THE ELECTROSTATIC TECHNOLOGY

#### THE SOLUTION IS SPRAYED UP TO 3 METERS

While Magna carries out its usual cleaning activity, the sanitizing liquid is sprayed by groups of nozzles positioned above the tank, and then transported up to 3 metres away in distance and height from the force of two turbines, and by another group of nozzles positioned at the rear base of the machine, intended only for the floor.

# Magna

#### **DIRECTIONAL NOZZLES**

The spray can be directed according to the needs of the site, by rotating the turbines 180° from top to bottom and 180° from right to left.

#### **SANITIZING SPRAYER**

The sprayer allows to sanitize the machine at the end of the shift, taking the solution from the designated tank. During the maintenance phase the operator can spray the sanitizing solution inside the tanks, in the area where the squeegee and the brush are located, on the contact surfaces such as the steering wheel, dashboard and driver's seat.

You can choose to activate the spray only on one side or the other, according to the requirements of the specific environment you are sanitizing.

### SEPARATE NOZZLE OPERATION: UPPER AND LOWER

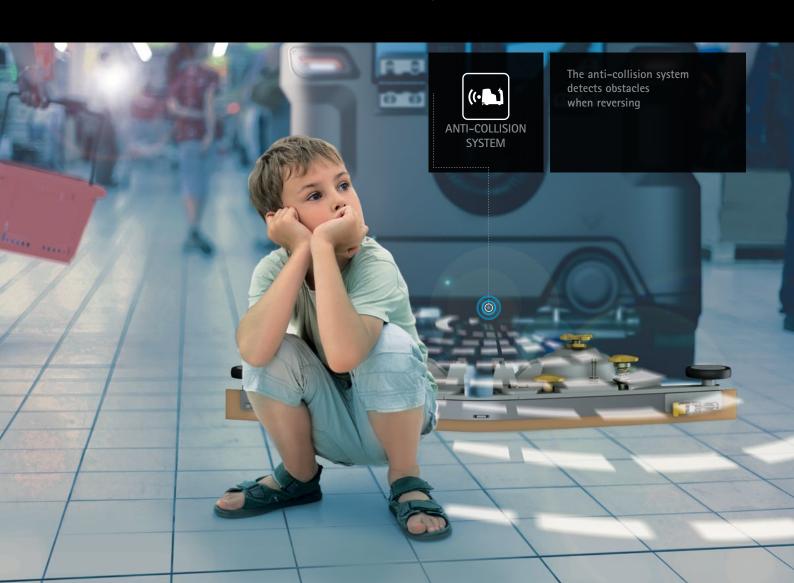

The upper and lower nozzles are also independent, allowing you to adapt the activity according to the structure of the environment and avoid wasting solution.

TECHNICAL DATA		Magna Disinfector
Sanitizing solution tank	1	18
Lower nozzles	(no.)	(2)
Upper nozzles	(no.)	(4)
Lower nozzles flow rate	I/min	0,245
Upper nozzles flow rate	I/min	0,465
Total flow rate	I/min	0,711
Operating time with lower nozzles	min	73
Operating time with upper nozzles	min	38
Total operating time	min	25
Machine dimensions (I x h x w) (min-max)	mm	1920 1660 1085
Drop size	μm	100

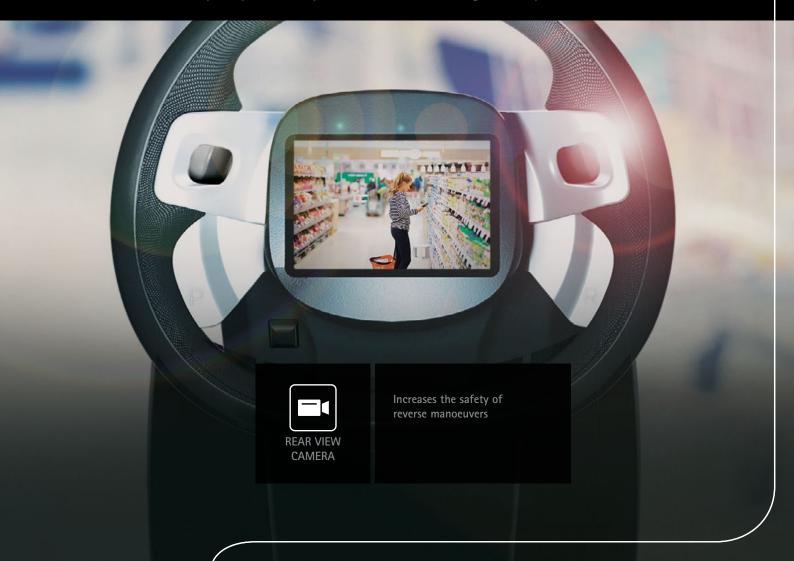

# Designed to be the safest machine in any situation

### **ACTIVE TECHNOLOGIES to prevent accidents**

### Safety is paramount

The Magna is equipped with a host of safety systems and features to keep the operator in complete control at all times, working with total peace of mind

## Designed to be the safest machine in any situation

#### **ACTIVE TECHNOLOGIES to prevent accidents**

Enhances visibility in dim light

DISPLAY

**STEERING** WHEEL **CONTROLS** 

The steering wheel controls offer the operator even greater control when cleaning, and also improve safety by eliminating distractions and letting the operator keep his or her eyes on the zone ahead of the machine

**CRUISE** 

Control device letting the operator set the required speed

Automatically reduces speed when steering without the operator using the brake

**ESC - ELECTRONIC** STABILITY CONTROL

To protect operators working in warehouses and logistics centers

**GUARD** 

Highlights the presence of Magna to avoid accidents when visibility is obstructed by shelves or other equipment

**BLUE SAFETY SPOTLIGHT** 

CONTROL

Maintains a constant speed when driving downhill, and prevents sudden increases in speed caused by gravity

The traction control system, which brakes and holds the machine when the accelerator pedal is released, provides assistance for both uphill and downhill gradients

Is automatically operated when the machine stops. It works as a safety parking brake

**ELECTROBRAKE** 

**HYDRAULIC** DRUM BRAKES

Self-adjusting, guaranteeing the best braking performance

Front and rear LED headlights maximize work safety in all conditions

LED HEADLIGHTS

### **EXPERIENCE CONNECTIVITY**

My.Machine app updates you in real time providing all the essential information to help you keep high the fleet performance. You can see from your smartphone or tablet where your machines are, if they're carrying out the cleaning task or if any anomaly occurred. You can see the list of the services performed, the charger logs and anomalies occurred, in order to have a complete overview of the health status of each machine.

### Discover FFM and experience the advantages of being constantly connected with the My.Machine app!

Keep tabs on your machines remotely when you want and from wherever you want!

**GEOLOCATION** 

It shows on a map the machine.

**USE INFORMATION** 

It's possible to know in what working mode the machine is operating and for how long. Moreover, it provides information about the duration of each intervention and the sq.m cleaned.

#### **HEALTH STATUS**

Anytime is possible to monitor the health condition of both machines and batteries to have a clear view of the fleet availability and optimize its coordination.

#### **ENVIRONMENTAL IMPACT**

All the data related to the CO produced per intervention are available as well as the water and detergent consumption, in order to take action and improve the performance.

#### **ALARMS**

The anomalies occurred are summarized in a list which includes a description of the type of issue. and the date and time of the event. It helps you to have an overview of the improper uses that need to be corrected.

#### **BATTERY RECHARGE**

It sums up all the complete and opportune recharges performed, the residual charge and the charge settings. This is an essential set of information to extend the battery lifespan and reduce the related costs.

#### **SFRVICES**

An overview of the list of the maintenance services performed allows to identify discrepancies with the health condition of the machine in case an anomaly is detected, and to monitor the inspections of the whole fleet.

# Sustainable solutions to protect the environment

#### FLR-FIMAP LONG RANGE

Reduces water and detergent consumption per cleaning operation by up to 66%\*. This is a system which recycles detergent solution to increase autonomy: to scrub more sq.m. while using less resources

#### **FSS-FIMAP SOLUTION SAVER**

Water and detergent quantities are separately dosed, reducing consumption by up to 50%

#### FWF-FIMAP WATER FLOW

Ensures uniform cleaning results across the entire working width on the first pass, optimising detergent solution consumption

#### **FES-FIMAP ENERGY SAVER**

Reduces energy consumption by up to 35%

#### LED TECHNOLOGY

Up to 80% lower energy consumption than conventional headlights.

The LED headlights consume much less energy than conventional headlights, offer a longer lifespan and illuminate with a brilliant white light similar to natural daylight

#### DISINFECTOR

Reduced consumption of sanitizing solution, thanks to a more efficient distribution given by the electrostatic\_technology

**NOISE LEVELS** 

FNC-FIMAP NOISE CANCELLING Reduces sound pressure

\*Saving calculated on a triple recycling cycle

# Choose the right version for your sector

DUAL DISC with 2 disc brushes or 2 pad holders CYLINDRICAL with 2 cylindrical brushes and a debris hopper for small sized solid debris

# Enhance it with the most suitable accessories for your specific requirements

#### **OPTIONALS**

Vacuum wand

Spray gun

Seat with armrests and seat belt

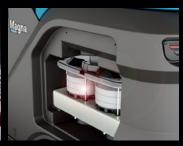

FFF-FIMAP FAST FILL

Side scrubbing brush (available for disc versions)

2 side sweeping brushes increase cleaning performance along walls (available for Cylindrical versions)

Dual 3-stage vacuum motor

FFM-FIMAP FLEET MANAGEMENT

Front and rear LED headlights

Rear/front super elastic wheels, for minimal Overhead guard and bumpers vibration and increased comfort

**FSS-FIMAP SOLUTION SAVER** 

FLR-FIMAP LONG RANGE

Disinfector includes two groups of nozzles located above the tank for sanitizing vertical surfaces and a group at the base of the machine intended for the floor

Sanitizing sprayer to sanitize the machine at the end of the shift (only available with the Disinfector)

Antibacterial tanks help inhibit the growth of bacteria and mold

Recycled plastic tanks

AQUư

AQUÆ® + DS (Detergent dosing system)

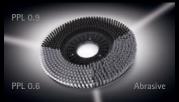

AQUÆ® + DS + Spray gun

AQUÆ® + Spray gun

#### **ACCESSORIES**

A wide choice of disc or cylindrical brushes in PPL is offered, 0.6 or 0.9 thick. These offer the perfect solution for dealing with any type of dirt on any floor

Abrasive brushes: Ideal for heavy duty cleaning on industrial surfaces

Rear squeegee rubber blades

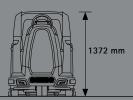

33 SHORE (PARA): For maintenance cleaning of smooth floors 40 SHORE (PARA): For stubborn dirt on floors with joints

POLYURETHANE: For heavy duty cleaning on industrial floors, even with wide gaps

### **DIMENSIONS AND TECHNICAL DATA**

		DUAL DISC		CYLINDRICAL	
TECHNICAL DATA - Magna		Magna	Magna Plus	Magna Cylindrical	Magna Cylindrical Plus
Productivity theoretical	up to sqm/h	9450		10980	
Estimated coverage	up to sqm/h	6300		7320	
SCRUBBING SYSTEM					
Working width	mm	1000		825	
Working width with side brushes	(no.) mm	(1) 1050		(2) 1220	
Brush motors	(no.) V/W	(1)	(2) 36		1220
Brush rpm (central / side)	rpm	180	/140		 0/75
Brush pressure (min - max)	kg		-150	35÷45	
	3				
TANK AND RECOVERY SYSTEM					
Solution tank	1			90	
Recovery tank	1	195			
Suction motor	V/W	36/650			
Vacuum water lift	mbar	129 18			
Detergent tank capacity (FSS)	1				10
Maximum volume of the debris hopper					16
BATTERY SYSTEM					
Supply/traction	V		36/	aut.	
Batteries	(no.) V/Ah C5	(1) 36/360 WET			
Battery run time*	up to h	7	5	5,5	5
PROPELLING SYSTEM		_			
Forward working speed	km/h	6			
Transport speed	km/h	9			
Gradeability (Working / Transport at gross weight / Trailer ramp empty)	%	8 / 8 / 17			
Traction motor	V/W	36/1000 DC	36/850 AC	36/1000 DC	36/850 AC
SPECIFICATIONS					
Machine dimensions (L x h x w)	mm	1837 1372 1085			
Height with overhead guard	mm				
Squeegee width	mm	1045			
Machine weight empty without batteries	kg	421			
Machine weight empty with batteries	kg	837			
GVW (Gross Vehicle Weight)	kg	1205 1224		224	
Sound level (ISO 11201)	dB (A)	69 70		70	
Sound level (ISO 11201) - Eco Mode	dB (A)	-	66	-	66
Minimum aisle turn	mm		24	50	

<sup>\*</sup>Run times are based on continuous scrubbing run times
